

LET'S GO "TRUCKIN"

For a number of years, I have been considering putting together a truck tour. I'm thinking perhaps it should include but not be limited to all manner of commercial vehicles including pickups, taxis, limousines, depot hacks, truck tractors and a hearse or 2, just to name a few.

The tour would be centered in eastern Pennsylvania in the Allentown-Bethlehem-Easton area and likely include 4 days of touring.

The "centerpiece" of the tour would obviously be the Mack Truck Museum but will also include other transportation related venues along with some local history.

I am considering middle to late May or early June, as the weather is not yet abnormally warm, and in 2027.

Since I'm attempting to gauge the level of interest in a tour of this nature, I'd like all who are interested to send me an email indicating your interest. I'm not asking for a commitment.....if you feel you would be interested, just let me know.....

Once I have determined the level of interest, positive or not, I will do a follow-up article in the Touring Chronicle to keep all apprised of the status.
